## Thermoset and Composite

Our L.V. Lomas technical sales team has both the experience and industry knowledge to help you successfully meet any composite formulation challenge. Our comprehensive product range covers resins and catalysts to flame retardants and pigments.

Below you will find a list of solutions that L.V. Lomas supplies to the composite industry. Our products are all sourced from the world's leading manufacturers.

Requirement	Solutions
Additives	Air Release, Wetting and Dispersing
Colour Pigments	Anatase Titanium Dioxide, Rutile Titanium Dioxide, Carbon Black, Chrome Green Oxide, Iron Oxide, Zinc Ferrite, Organic Pigments, Blanc Fixe, Mixed Metal Oxides
Curatives	Aliphatic Amines, Aminoamines, Blends, Diglycidyl Ethers, Mannach Bases, Polyamides, Reactive Diluents
Effect Pigments	Pearlescent Pigments, Fluorescent Pigments, Metallic Pigments (Aluminum & Bronze), Optical Brighteners,
Flame Retardants, Smoke Suppressants	Alumina Trihydrate, Magnesium Hydroxide, Antimony Replacements, Zinc Borates, Halogenated Flame Retardants, Phosphorus Based, Molybdenum Oxide,
Functional Extenders	Solid Surface Granite and Onyx ATH Fillers, Calcium Carbonate, Barium Sulfate, Calcined Clay, Air Floated Clay, Talc, Nepheline Syenite, Ground Silica
Light Stabilizers	U.V. Absorbers
Lightweight Fillers	Glass Bubbles, Ceramic Microspheres
Lubricants, Release Aids	Metal Stearates, Glycerine
Packaging	Lithographic, Metal and Plastic Containers UN Designations
Resin	Acrylic Monomer (MMA, MAA), Epoxy Resins, Isocyanates, Polyester Polyols, Polyether Polyols
Thixotropic Agents	Fumed Silica, Precipitated Silica, Calcium Oxide, Magnesium Oxide, Non-Associative Thickeners

These are just some of the hundreds of solutions we can bring to your enterprise. Call your L.V. Lomas representative today and start converting your thermoset and composite challenges into flawless products.

Proudly representing our Principal Partners in the thermoset and composite industry
